Preview of New Plants

We will have more than **50 NEW cultivars** to choose from for 2010. You will see them in our winter catalog due out in January. Or keep checking our website, raintreenursery.com as we feature our new introductions online throughout the fall! We will offer several new short season **wine and dessert grapes**, each grafted on hardy, early ripening rootstocks. Look for several delicious new **raspberries, plums, apples and medlars** as well as other exciting introductions in our next catalog! Here's a sample.

THE BEST HEIRLOOM FRENCH PLUMS

REINE CLAUDE DOREE

This is the best of the Gage plums, the famous old Reine Claude d'Or from France. It is a small yellow/green plum ripe in Aug. or Sept. It has an incredible sweet juicy flavor and is prized by connoisseurs. From Andy Mariani's orchard. Choose another Gage plum for pollination. Zones 6-9. #C015 Each \$26.50

PRUNE D' ENTE 707

The most prized of the French "Agen" prune plums. It is large and very sweet with red/violet skin and yellow flesh. It matures early in September in France and is self fertile. It is outstanding eaten fresh, dried, stewed or used in jam. From Andy Mariani's orchard. #C111 Each \$26.50

Customer Satisfaction Guarantee

We supply quality plants. Our plants are guaranteed to arrive alive and well and be true to name as labeled. When given proper care, they will leaf out and grow. We are proud of our 99% success rate. Claims for unsatisfactory plants, or shortages must be made within seven days of receipt of the order to get a full refund. Call us immediately and we will work with you to correct any problem. If any plant fails to leaf out and grow and you believe the plant was defective, notify us during the first growing season and we will place a credit for you for the cost of the item, in our system, towards future purchases. Or we will replace your plant, one time, free provided you pay the shipping. Our liability is limited to the purchase price of the plant. Sale items are guaranteed at the sale price. Bonus items are not guaranteed.

Arbor Day Foundation Hardiness Zone Map

Listed are the average minimum yearly low temperatures, not the the coldest temperatures ever recorded. A plant not fully dormant can be damaged at much warmer temperatures. Other factors, including chilling requirements and heat units, are critical to plant performance within a climate zone. These are the zones listed for each variety throughout the catalog! This 2005 map reflects recent warming trends. See our website for more climate information.
